ICT sector in the Republic of Moldova

Sector Overview

The IT industry in Moldova is the fastest growing industry, offers the highest salaries, employs the youth and the creative people, digitally transforms the entire society and is a Government top priority.

Small but digitally literate country - Moldova its an ideal testing ground for piloting new services and products.

The information and communications technology industry has become one of the locomotives of economic growth in the Republic of Moldova in 2019. As expected, the incentives offered by IT virtual Park legislation gave a significant boost to the ICT sector Development. At the same time, the country's rising position in international ICT ranking plays an instrumental role in building a regionally and globally competitive economy.

During 2015-2019, the IT industry recorded a triple increase of the annual sales revenue - from \$126 M to \$396 M, representing 3.1% of GDP and an increase of over \$79.2 M, only in 2019. In the reference year, together with the sales volume in the electronic communications industry – of \$408 M, the ICT sector accounted for 7.1% of national GDP.

Telecom Infrastructure

Moldova is well positioned in terms of communication infrastructure, with mobile penetration well over 100%, and Points of presence of Fiber Optic backbone network (POP) at 98.2%

High Internet Speed

According to the Speedtest Global Index as of August 2020, the Internet download speed in Moldova (81.11 Mbps) is higher compared to other countries in the region: Bulgaria (60.83 Mbps), Ukraine (59.13 Mbps), Montenegro (47.17 Mbps), Albania (37.11 Mbps)

ICT sector in the Republic of Moldova

Sector Overview

The volume of exports of ICT products and services exceeded \$300 M in 2019. There has been a qualitative transformation of the ICT sector from Internet access networks and services to the highest value-added, export-oriented IT products and services. The positive evolution in the ICT sector is accompanied by the increase in the number of companies in this period - from 1,700 to 2,300, and of the employed staff - from 21,300 people to 29,600 people, ensuring the best level of salary in the economy.

As per estimates, the IT industry employs over 15,000 professionals, servicing mainly European and US markets. The service focus is across multiple industries, especially in Government, Banking and Telecom sectors.

The volume of investments in computer services doubled in the reference period and reached \$156 M in 2019, increasing by about \$48 M compared to 2018. That means that more and more investment is being made in streamlining processes and digital innovation in various economic sectors.*

IT exports by type of services

Technical expertise

Moldovan programmers are well versed in .NET, Java, C/C++, PHP, Python, Ruby. These programming skills are generally sufficient to create the majority of business and mobile applications thus the local specialists are well equipped to approach most projects. Less popular ones, but still available are React, Scala, Cloud, Big Data.

IT Start-up Visa

The Law nr.121 dated 23.07.2017 simplified the regulations for obtaining residency and working permits by foreign IT professionals, investors, and entrepreneurs. It aims to support the IT field in order to create a fast and efficient facilitating framework for the access to the Republic of Moldova of people investing in IT, highly qualified specialists in this field, as well as members of their families, from both EU and non-EU countries.

The foreigners with senior management positions within entities performing information technology activities and specialists in the mentioned field are exempted from the obligation of obtaining a residence permit for working purposes. They are entitled to obtain a long stay Visa up to 4 years, with the right to extend it. At the same time, the right of temporary residence is granted to foreign IT specialists for a cumulative period of up to 2 years, with the right to extend it, for a new period specified in the contract.

ATIC

Moldovan Association of ICT Companies (ATIC) is the action leading association and the voice of the Moldovan ICT industry that promotes the development of the ICT sector in the Republic of Moldova through viable partnerships between companies, similar organizations, government, state institutions and international organizations. The association was established in 2006 to represent the industry on different policy and legislative issues and to facilitate the exchange of best practices between members. ATIC mission is to advance the country's competitiveness as a destination for value-added IT and BPO for international clients. ATIC is the umbrella for ICT sector by providing a forum in which members can discuss and find solutions to common problems.

No. of employees	34	38	41	50

INFRASTRUCTURE

Office space: 1600 m2, organized in 14 mini open spaces, 3 meeting rooms; 80 workstations.

IT Infrastructure: Mini datacenter; Multihomed Network/High Speed Internet. Personal servers.

TECHNICAL SKILLS/EXPERTISE

System Architecture: Database architectures; Data modeling; SQL and relational principles; Network Protocols ; C++; Multi-threading; High-load Systems ; Internet Routing.

Software engineering:

Back end: C++; BGP; Networking; Perl/Python/Shell scripting language.

Front end: Javascript (ES2018); Modern CSS and HTML (also sass, less); Node JS 8+; VueJs (and/or Angular, React).

System and Network Engineering: Experience in Linux servers administration; Experience in network management (Cisco, Juniper routers); Deep knowledge of TCP/IP, BGP.

Quality Assurance: Test Automation (Python / Java); Automation tools (Selenium, TestComplete, Katalon Studio); Automation frameworks (Serenity / Cypress); CI/CD tools: Jenkins.

SERVICES

Noction Intelligent Routing Platform;

Noction IRP Lite;

Noction Flow Analyzer.

HUMAN RESOURCES

System Architect x 2 (8-20 years of experience); Project manager (4 years of experience, PMI certified);

C++ Back-end Developers x 6 (5-20 years of experience); PHP Front-end Developers x 6 (4-12 years of experience); Data Analyst (20 years of experience); System and Network Engineers x 12 (2-15 years of experience); QA Specialist x 5 (1-8 years of experience).

WORK PROCESS

The processes required and relentlessly audited by ISO help NOCTION to continuously improve its products as well as the way the team operates and communicates with clients. Moreover, Noction has its own tools and software (adapted to the company needs) that are strictly adhered to.

NOCTION favors AGILE software development methodology.

INNOVATION

Noction is committed to developing new technologies in order to provide clients with the most innovative network optimization and analysis solutions. Noction know-how has been recognized internationally.

In 2017 the company secured "System and method of providing a platform for optimizing traffic through a computer network with distributed routing domains interconnected through data center interconnect links" patent number US9769070B2. In 2018 another patent number US10003536B2 was granted to Noction by the United States Patents and Trademarks Office – "System and method for managing bandwidth usage rates in a packet-switched network". Both indicating deep consideration of the company's technological advancements.

Noction is further heavily investing in research & development and plans to introduce new products and enhance the existing ones with new capabilities in the near future.

PRICE POSITIONING

High price positioning but justified, due to the fact that the company offers complex solutions.

CLIENT APPROACH

Client-oriented. The Marketing Department oversees the promotion of company products. Every region has its own account managers who are responsible for the clients.

CLIENT PORTFOLIO

RUTUBE Success Story (Video Streaming); Thomson Reuters Corporation (Enterprise); UK2 Group Success Story (Hosting Provider); Offsite Success Story (Data Centers); ATMC Success Story (Telecom); Steadfast Success Story (Data Centers); TETN Success Story (Research & Education); TierPoint Success Story (Service Provider); TCA Success Story (Service Provider); WiredTree Success Story (Hosting Provider); Network Platforms Success Story (Service Provider); Hivelocity (Case Study); Name Cheap (Improvements Note); Bandwith (Case Study); Sharktech (Case Study); Viva (Press Release).

Client groups: Datacentres; Telecoms; Hosting providers; Enterprises; Network service providers; Call centers; VOIP; Service providers; Media.

INVESTMENT OFFER

GOAL

- Looking for Partners (EU);
- Investment Attraction in the Development of a new product (Focus Cloud-based).

OUR COMPETITIVE ADVANTAGES

- The opportunity to earn an impressive margin on the product (40-60%);
- Large and evolving Network Monitoring and Management System Market size that is expected to grow to USD 11.0 billion by 2024, at a CAGR of 9.5%.
- A powerful brand with the existing diverse customer base.
- A clear vision and strategy for how to grow the company to 100x its current size.
- Proprietary technologies secured by patents, which make the company defensible against potential competitors in the future.
- The strong team with experience and demonstrated competence in a variety of disciplines, from engineering and development to finance, sales and marketing.
- Preidentified, proven cost-efficient, and scalable marketing channels.

TECHNICAL SKILLS/EXPERTISE

Web solutions; Databases: MS SQL/MYSQL, MongoDB; PHP, Python, CFML; Microsoft (authorized dealer); Linux servers and workstations.

CLIENT PORTFOLIO

Gamaion Consulting Services GmbH (Switzerland); SovaMax GmbH (Germany); SovaMax LLC (USA); Eminia Trading GmbH (Germany); Agava Trading GmbH (Germany); RA Trading GmbH (Germany); Lanius Trading GmbH (Germany).

Client groups:

Product distributors; Online retailers; Resellers; Warehouse processors.

CLIENT APPROACH

Telecomservis works shoulder-to-shoulder with their partners to solve complex challenges in ways that minimize business risk and maximize opportunity. Their world-class talent becomes part of partner teams, innovating with them and putting the right technology to work for their organizations. The company invests in building collaborative partner relationships that flex and grow to help meet new challenges with confidence, speed and agility.

Telecomservis is open to different channels of communication from classic phone, mail, skype, requests in ticketing system, conferences and business trips. We treat every project as an opportunity to create triple value – for our partners, their customers and the communities they influence.

INFRASTRUCTURE

Office space: 450 m2, organized in 8 offices; 40+ workstations;

IT Infrastructure: 2 servers (local and external); Internet 2 channels.

HUMAN RESOURCES

Telcomservis has a professional experience gained through more than 28 years of activity and various projects. There are over 40 software engineers and testers on board in Europe. About 15 developers of software have been a part of the company for more than 10 years, 50 employees more than 5 years.

The company launched and developed new projects for best job satisfaction, implemented different learning methods as shadowing and peer-to-peer learning.

WORK PROCESS

Telecomservis has its own software development process derived from 28 years experience in meeting customers needs. The company designed and created complex e-commerce platforms, that were tested and integrated in own ERP system selling goods on EBAY and AMAZON marketplaces as well as on retail sites. If a partner is willing to work in Agile the company is open to satisfy the needs, although from Telecomservis wide experience this method is more time-consuming, the company prefers more result-oriented processes. MTEAM continuously implements new technologies, innovations, and expertise for improving business processes and reduce partner's business risks.

INVESTMENT OFFER

GOAL

- To find big partners throughout the world, not only in the EU and USA.
- Interest in co-investment for developing commercial ERP systems, CRM tool for logistic companies and warehouse management customers

OUR COMPETITIVE ADVANTAGES

- Telecomservis has an extended area of provided services, offering support in the following areas: Accounting, Logistics, Pricing, E-commerce, IT support and Software Development etc.
- The company works like an integrated support team for its partners, creating customized services and implementing own developed ERP system according to partner's business needs.
- Telecomservis is flexible and adaptive when choosing a development methodology – during the project, it can course-correct for better alignment with partner's goals.
- The company is able to easily scale up the teams, thus reducing the time-to-value for partner's end users.
- The ERP system created by Telecomservis is user-friendly, can be used by a simple storekeeper or a CEO. The system is primarily designed for a resale business model but also supports B2C e-commerce platforms, wholesale and retail business models

- Support different accountability plans;
- Multilingual (Russian/Romanian/English).
- Oracle key product for non-Oracle traditional markets with acceptable price. Success in competition with 1Ci.com regarding Oracle and Embarcadero partnership. Own concept of ISV partners of UNA.md platform, similar with best practice from 1Ci and Oracle ISV. General business strategy look like peer-to-peer technology – no center, any partner for him own clients can be a center totally independent from Unisim-Soft, but Unisim-Soft as main company create full ecosystem for partners and clients (as a partners), like wiki, freelance market, software module market, cloud solutions, backup unified strategy.

XONTECH SYSTEMS

Software Development: Web development, Mobile development, CRM/ERP, Digital Design, Integration, Bespoke systems. Amdaris uses latest development platforms, frameworks and programming languages for Android, iOS and Windows, MS SQL Server, SSAS, ASP.NET Core, IdentityServer, Entity Framework Core, D3.js, Knockout.js, Crossroads.js, Angular, React, Vue.js, Yarn, Xamarin (iOS, Android, Mac), UWP, MvvmCross, SkiaSharp, NoSQL, Azure Cloud, Bootstrap, TypeScript, ADO.NET, GIT, MYSQL, ORACLE, REACT, ECLIPSE, PHP, RUBY, NHibernate Quartz.NET, Kendo UI MVVM, WCF, C#

Digital Transformation: digital opportunities, migration to Cloud, paper to digital, Technology Innovation, COTS Integration, Application Modernisation.

Application Support: Amdaris provides 24/7 support, so once a client's application has gone live, they can rest assured that someone is on-hand to manage any task. Amdaris has clear and defined SLAs ensuring that the client is covered for any degree of issue, immediate support being provided by a designated team of talented engineers.

HUMAN RESOURCES

Amdaris has a flexible and agile talent pool, consisting of balanced teams of senior and middle developers, tailored to clients' needs and the requirements of each project. Our Developers are certified with Microsoft, ICTQB, Oracle, etc. Amdaris is continually investing in the education of all staff, providing ongoing internal training, also a recently implemented mentoring programme for junior and new members. The team shares knowledge on regular basis. Amdaris offers summer and winter internship programmes, English classes, and has a strong partnership with the Technical University of Moldova.

INFRASTRUCTURE

Office space: Chisinau office area of 1750m², 5 floors x 350 sqm. Capacity: > 200 employees, potential growth to additional 2000, for 600 employees.

IT Infrastructure: Latest technologies both hardware and software. As well as this we have a high CSR awareness when choosing our hardware suppliers. Amdaris is technology agnostic when it comes to other applications like Microsoft Windows, Linux, Apple, clouds, etc.

WORK PROCESS

Based on agile methods, the team becomes an extension of the client's business, giving complete end-to-end project visibility. Amdaris uses a collaborative management system, updated in real-time so all changes are visible immediately. We use Scrum, Agile, Waterfall approach depending on the project. Amdaris has managed several projects all of which required the development of e-commerce platforms, e-learning and e-pay, most being for UK clients.

CLIENT APPROACH

A flexible and client oriented company, Amdaris believes in building a truly integrated and collaborative partnership with clients. We invest our time and effort in ensuring we meet our clients' vision. We apply industry standard for the tools we use, underpinned by a best practice agile methodology. Amdaris respond quickly and effectively, always ensuring the best experience for the client. The company uses a proprietary Amdaris Project Health Index (APHI®) method to give full transparency based on engagement, constant communication, daily stand ups within the team, but also after sales support. The team sizes are scalable, ensuring clients' needs are met at all times.

INNOVATION

Company is constantly developing internal innovative projects, R&D application for optimizing internal processes and has a great experience designing tailor made projects.

PARTNERSHIP OFFER

GOAL

The company is interested in finding new customers.

OUR COMPETITIVE ADVANTAGES

- Exceptional people and processes;
- Ultimate problem solvers, connecting the right people with the right task, and collaborating seamlessly;
- The company is where proven solutions meet creative new approaches;
- Provide solutions for each unique requirement. This evolves around reducing risk and maximizing impact, through a series of best practices within the technology space.
- Amdaris has been voted one of the top employer in Moldovan for the last few years.
- High quality of service at an affordable and transparent cost.

Project manager x 4 (10 years' experience); Software engineers and web developers 80 in total (1/3 seniors with 5-10 years' experience, middle 1/3 - 3+ years' experience, senior 1/3); QA Specialist x 10 (1-5 years' experience).

INFRASTRUCTURE

Office space: 2 offices in Chisinau - total area of 1000m².

IT Infrastructure: 100 laptops with 2 monitors each, high-speed internet connection from two providers. Advanced server infrastructure and cloud-based backups at their HQ in Romania.

WORK PROCESS

AROBS is more oriented on developing long-term contracts and collaborations including the project-based approach, outstaffing or hour-billing.

Software flexibility is both our greatest strength and weakness. To leverage this amazing strength and avoid the pitfalls, we follow a rigorous development process. One of the most popular approaches to these fast-changing business requirements is the Agile software development. It advocates for self-organizing, cross-functional teams, encouraging flexible and rapid response to change. AROBS also uses methodologies like SAFe, meant for large teams and large projects. Simultaneously to Agile, depending on the industry there are other approaches still in use, like the waterfall and V-model among others.

AROBS Chisinau has 11 Scrum Masters (not yet certified but with relevant experience in projects delivery).

CLIENT APPROACH

Continuous communication with the client is important for AROBS. The project manager is constantly connected to the client from designing until delivering. It includes mailing, video conference calls and among others at least one physical meeting every 6 months (for long projects).

INNOVATION

The company offers unique solutions, according to each customer' vision.

PARTNERSHIP OFFER

GOAL

To find relevant clients in the EU.

OUR COMPETITIVE ADVANTAGES

- Highly skilled software developers and IT specialists;
- Wide area of expertise covering multiple business lines;
- High flexibility to adopt and integrate with the customer's specific processes and standards;
- Exposure to international customers from 14 countries on three continents;
- Dedicated team ready to face new challenges and adopt new technologies;
- Great English knowledge;
- Open, less hierarchical, innovative culture.
- Over 10 years of local experience in developing software for the automotive industry.

Native and Cross-Platform Mobile Production: Swift5, Storyboard, Autolayout, VIPER, Firebase Crashlytics, Fabric, Kotlin, JAVA, ADT, NDK, React Native, Flutter.

INFRASTRUCTURE

Office space: 1300m2 office, organized as open spaces, meeting rooms, sales and administrative spaces.

IT Infrastructure: 50+ units; Redundant Multihomed Data center; Self-owned network (ASN: AS206678).

HUMAN RESOURCES

Team of 50 IT engineers.

3 Senior Project Managers (8 years' of experience); 15 Mid-Level Developers (2 to 3 years' of experience); 10 Senior Developers (4 years' of experience); 3 Senior Business Analysts (4 years' of experience).

WORK PROCESS

Integrated IT Process (CMMI L4)

Operational Level: A combination of CMMI, with Balance Scorecard as the main performance management driver

Project Management Level: PMI-ACP \ Agile (Scrum & Kanban) optional Waterfall-Agile Hybrid Management (for fixed-price budgets, with a 40% budget variation). EBS Integrator is focused on delivering multi-tier marketplace platforms, that are delivered via microservice architectures. Most of the them focus on automation, process optimization strategies and enhanced redundancy and performance management strategies. EBS is an Agile-focused organization and flexibility is key in its service delivery. The company's consultancy add-on is available for each of its stakeholders and is one of the pinnacles that enable agility for EBS Integrator.

Fixed Pricing available – for instance, an MVP (per platform) can reach between 10 to 20K EUR, depending on scope.

CLIENT APPROACH

EBS is designed as a customer-facing IT provider. It chooses best-fitting technologies, enables a complex communication layer and are highly available, even within long-distance deliveries. The company has several control checks at every delivery stage and provide alternative contact options. If something goes wrong, it will make sure to solve the issue in a timely mater, strongly defending the customer's interest. Particularly, therefore EBS is assigning an account manager, to each stakeholder, in addition to those pre-defined contact points implied in software architecture, planning and development.

Empathize, Iterate and Communicate are the core verbs throughout the entire lifecycle: from gathering critical requirements to monitoring the final product in production. This allows EBS to quickly identify and process solutions for the stakeholders – regardless of complexity or scale limits.

As a result, EBS hasn't had a single project drop, in its 10-year service history and 80% of the clients are either recurring or referral customers.

PARTNERSHIP OFFER

GOAL

EBS is looking for partners that would require Dedicated IT Provisioning Services across Betting, E-commerce, FinTech and Healthcare.

OUR COMPETITIVE ADVANTAGES

EBS INTEGRATOR believes legacy systems are not a throw-out, but an opportunity and new ideas deserve a fast-to-market approach. Re-engineering "the old" into modern platforms and implementing processes as software is the shortest path to productivity and this is what it is best at.

- Powered exclusively by high quality peer-to-peer prospect relations;
- Incredible time-to-market metrics, enhanced service scalability and outstanding performance management strategies;
- 100% Delivery – 0 ditched projects;
- Highly qualified team;
- Full software life cycle development process;
- Customer centric delivery;
- 100% exclusivity for the developed business logic;
- Dedicated business analysis and IT consultancy for new and recurring products;
- A dedicated IT division for product development and maintenance, similar to in-house provisioning, without any recruitment, operational or management costs;
- A to Z digitization (from process to software);
- Just in time maintenance.

CLIENT PORTFOLIO

e-Apostille, Ministry of Justice, Moldova

Moldova is the only country that owns a fully online platform for application, issuing and verification of apostilles.

MTender, Ministry of Finance, Moldova

public procurements in Moldova are more user-centric and efficient because there are delivered through private platforms within a public-private partnership. Esempla is managing one of the private platforms e-Licitatie.

eIntegrity, National Integrity Authority, Moldova

all 70K subjects of integrity declaration submitted their statements within a month, according to legal regulations. All data about incomes and personal interests were verified and validated through cross-checking with all the relevant state-data stakeholders. (se include cee ace nu e in bold doar daca incapa)

Client groups: Governments (e-Government agencies); Public authorities (Ministries, public agencies); Local authorities (City Hall).

PARTNERSHIP OFFER

GOAL

Looking for partners for long term collaboration.

OUR COMPETITIVE ADVANTAGES

- broad expertise achieved while applying GaaS concept for public services digitization;
- Strong digital skills and capabilities in terms of workforce technology to enable a cloud operating model for the public service delivery;
- Experience with public sector emerging markets;
- 3 working languages (Romanian, Russian, English) enough to cover a wide area of CIS, Central Asia and South and Eastern Europe.

ISD is a spin-off of the Dutch Inther Group. Today ISD is still a strategic development and maintenance partner to Inther but it has developed to a 2-way relationship. When needed, Inther supports ISD and its clients in The Netherlands. In this way the company can assure that the projects have a solid Dutch back-up. Starting up as part of their development team it soon became a company in its own.

SERVICES

The service ISD offers can be easily summarized: it's JAVA. Their offering consists of three types of outsourcing approaches: Innovation; Product development; Maintenance.

TECHNICAL SKILLS/EXPERTISE

ISD has a solid experience in developing applications based on **Java platforms such as J2EE, J2ME and J2SE.**

Java Technologies: Spring; JTA; JSF; JSP; Hibernate; JMS; ActiveMQ; Camel.

Frontend: React; Angular; Vue.

Relational Databases: Oracle; PostgreSQL; MySQL; H2; SQLite.

Platforms: Windows Server; Android; AWS.

Version Control and Defect tracking: JIRA; GIT/SVN; Maven; Jenkins; Confluence; Dokuwiki; Junit; Cucumber.

HUMAN RESOURCES

Senior Developer (10 seniors, 6+ years of experience); Middle Developers (10 middle, 3+ years of experience); Junior Developers (19, 0+ years of experience); QA (2 Senior Testers); Project manager (2 PMs).

INFRASTRUCTURE

Office space: 1000m2 open space, organized in 7 areas; 13 working pots/places; 50 units.

IT Infrastructure: Internal and External (Netherlands) server; 2 Optic fiber internet channels.

WORK PROCESS

As IT process management the company is based on JIRA, CONFLUENCE.

IRP – for HR/Recruitment.

CRM – for Sales.

ISD favors Agile software development methodology. The customer's benefits are: feedback on an early stage of the project; transparent processes; quality ensured by the framework.

Innovation is done in-house: Warehouse Management System (WMS) designed for smart control of the automated and mechanized processes in a warehouse. The company can innovate at clients' request.

CLIENT APPROACH

ISD encourages the client to be involved in the project development cycle from the very outset. Thus, it minimizes the risk of exceeding the budget and not meeting the deadlines. The client is more in control and can easily influence the end result.

1. User definition – ISD defines the core functionality and the scope of the project;
2. Kickoff – analyzes the most important features and prioritizes them together with the client. The tasks are broken down and arranged into sprints;
3. Implementation – daily 15 min meetings measure the progress and detect the issues that are blocking the team. Clients receive progress status reports on regular basis. At the end of the sprint the team deploys the solution for client's review and approval.
4. Deployment – ISD presents the result of the work to the customer at the end of each sprint.

PARTNERSHIP OFFER

GOAL

To find new partners (Benelux).

OUR COMPETITIVE ADVANTAGES

- Top talent – The ISD team is professional, organized, and highly qualified;
 - Full-transparency - daily check-ins and desk time reports; constant communication via Slack/Skype;
 - Cost - lower your costs by 30-40% by building a dedicated development team;
 - Managed service – ISD offers a fully-managed development service. The client gets a dedicated project manager at no cost;
 - Time zone - ISD works in US/UK time zone, hence it keeps constant communication and can deliver software faster.
 - Cultural compatibility and language proximity;
 - Quality services;
 - Educated professional pool;
 - Technical infrastructure (Java);
 - Language proximity.
- Pricing methods:**
- Infrastructure;
 - The value of long-term contracts;
 - Extension potential.

Client groups: Tourism, Banking, Education – Universities, Heath – Hospitals, Media, Electric grid, Textile, Automotive.

QUALITY POLICY

ISO 9001 CERTIFIED since 2008

Pentalog

KEY INDICATORS

USD	2015	2016	2017	2018
Turnover	2,548,700	3,568,700	4,343,100	4,540,300
Profit	229,700	197,900	266,100	181,800
No. of employees	99	122	129	143

SERVICES

Pentalog's Agile UX/UI design teams put user-centric expertise to work alongside our product owners and engineers to create intuitive, human-centered products through iteration and testing. Pentalog delivers Agile UX/UI design services for web, applications, eCommerce, Software, IoT.

TECHNICAL SKILLS/EXPERTISE

Java, PHP, .NET, JavaScript (NodeJS, ReactJS, VueJS, Angular), Go, Python, Android, iOS, React Native, Kotlin, Swift, Flutter, Quality Assurance, DevOps, IT Security, Due Diligence, Agile Consulting, Marketing Automation, UX/UI, Product Design, Digital Innovation.

INFRASTRUCTURE

Office space: 1550 m2; 230 workstations.

IT Infrastructure: 2 servers in the local datacenter; Internet (1000 Mbps – internal; 200 Mbps – external).

HUMAN RESOURCES

With 1,100+ engineers in-house and access to more than 400,000 vetted profiles, we can staff nearly any type of software or digital project, typically within 4 weeks.

WORK PROCESS

Thanks to 20 years of experience of building digital products in outsourcing and Agile, Pentalog has created a set of rules that they call a collaboration framework. Depending on each specific context, the collaboration framework is adjusted together with the client.

ISO-certified service in all Pentalog's nearshore and offshore delivery centers.

AGILE

Agile methods applied by Pentalog are based on 3 main principles:

- Increase visibility of the team's work;

Pentalog use Kanban methodology and a task board in order to visualize the team's workflow.

- Limit Work-In-Progress (WIP);

Company applies WIP, which is Kanban core concept that refers to finding the right equilibrium between the team's capacity and the client's demand.

- Optimize lead time;

The next step after setting WIP limits is to measure the average time necessary to take one item through all the board stages in order to increase predictability, commit to SLAs and meet the release plan.

INNOVATION

Pentalog's digital innovation bundles may include the following services, depending on project requirements: Lean strategy workshops, Customer interviews, Customer surveys, Concept development, System level design, Backlog development, Rapid prototyping, MVPs, Go-to-market testing, Full-stack web & mobile development.

PRICE POSITIONING

Transparent service pricing due to extensive platform developed in-house. <https://my.pentalog.com/>, where clients can find the operated tariffs and can estimate the services cost for the project themselves.

CLIENT APPROACH

English and French speaking developers across three continents, allowing you to find IT experts in or near your time zone. Flexible work models that enable customers to choose between dedicated teams, tech specialists for your in-house team, or freelance IT specialists. Our governance approach is based on the alignment with the client on the most relevant KPIs and the way of leveling them based on a Maturity Model. During the steering committee with the client, among other steering topics, the KPIs are analyzed, interpreted, and new goals defined (e.g. to Increase Security from Almost Good to Good according to the definition provided in the table).

Pentalog's Agile teams deliver 300 digital products yearly. Over a dozen clients have chosen to work with Pentalog for over a decade, and some for even longer.

PARTNERSHIP OFFER

GOAL

- Looking for partners (EU);
- Investment attraction in the development of a new product (focus cloud-based).

OUR COMPETITIVE ADVANTAGES

- Pentalog is the only end-to-end digital services player in the market;
- A 100% commitment to building trust and transparency. Developing high-quality digital products requires trust and transparency;
- Delivering products that work is just the start of adding value. Our true mission is to help clients create products and grow their business, responding to unmet user needs and evolving over time to engage and retain users. That's why we embrace Lean thinking, Agile/Scrum methodologies and DevOps best practices so that we can quickly create, deploy, test and iterate;
- We offer flexible engagement models to support all of your short and long-term objectives, including outsourcing, recruitment and freelancing;
- Our deep talent pool and proven ability to hire and retain digital professionals ensures access to world-class resources at a price that won't break the bank. A 100% commitment to building trust and transparency. Developing high-quality digital products requires trust and transparency, across our entire platform.
